\* Corrective batch fulfillment includes ONLY corrections from previous ftwilliam.com fulfillment that were previously submitted via batch process.

\* Corrective records can only be submitted via a corrective batch.

\* Filing electronic state corrections is not supported.

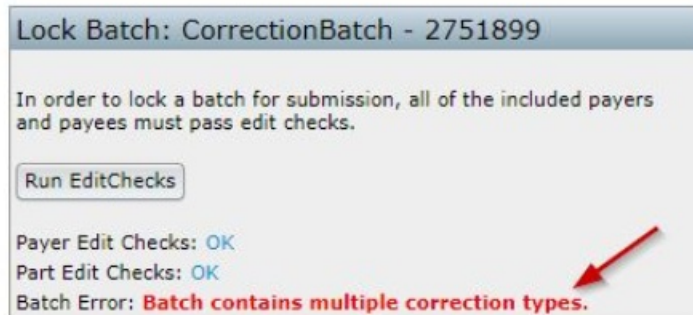

\* A corrective batch may only include either Type 1 or Type 2 correction records.

\* Separate corrective batches will need to be created per correction type.

Please Note: *Only one correction type may be added to a batch. If both Type 1 and Type 2 corrections need to be submitted, each correction type will need to be added to separate Corrective Batches.*

Users will have to run the edit checks for the corrective batch before users can lock the batch and submit for fulfillment.

If correction types 1 and 2 are added to the same batch, the system will provide an error in place of the lock option. The correction types will need to be separated to proceed.

ftwilliam.com does not offer a corrective service for state fulfillment.
